Hi Calvin, I reviewed the two Enclosures and they are attached with my comments/questions. One additional question I have about Enclosure 2 is wanting to be sure we are not including anything that would be considered CBI, since our comments note that we are reviewing the geomodel that was developed in part by data from SEI and IHS. You may have already checked that with Cadmus, but I wanted to be 100% certain that we do not inadvertently release CBI data.

I'll take a look at the cover letter and send you any comments/edits on that separately.

Thanks,  
David
